ENERGY SAVING CALENDAR

A YEAR'S WORTH OF ENERGY & MONEY SAVING IDEAS

January

Clean vents and replace filters.

While taking down your lights and other holiday decorations, make a point to clean your heating/cooling vents and filters to make them more energy efficient.

February

Make a habit of turning it off.

Turn off lights when you leave a room, and switch off power strips when connected items are not in use - such as computers, printers, etc..

March

Turn down your thermostat.

Turn down your thermostat a degree or two. Put on an extra sweater if you're feeling the difference.

April

Wash and dry clothes more efficiently.

Use a clothes line to dry your clothes if possible, for energy savings and outdoor freshness. Wash in cold or warm water instead of hot.

May

Leave the car in the garage.

Take an opportunity to explore public transportation available in your area. Dust off your bicycle and see where you can go via peddle power.

June

Insulate pipes and water heater.

Use Nansulate PT to coat your hot water heater and any exposed water pipes. This will reduce the amount of energy used to heat water, and help keep cold water cooler.

ENERGY SAVING CALENDAR

CONTINUED

July

Seal air leaks around windows.

Check for air leaks around window and door frames, and caulk to seal any you find. Did you know: You use can use Nansulate® HomeProtect Clear Coat on skylights or windows where clarity is not an issue to help prevent heat transfer, while still allowing difused light.

August

Vacation close to home.

Seek out local museums, zoos, galleries, and other vacation spots that will keep expensive travel to a minimum.

September

Prepare your home - insulate for winter.

Before winter heating bills hit, prepare your home by adding extra insulation where needed. Up to 1/3 of heat produced in the home is lost through walls, so making an investment by coating your home with Nansulate® will have long-term benefits on your energy bills.

October

Switch to energy efficient lightbulbs.

As days get shorter, you'll be using more electricity to light your home. Begin now switching to the more energy efficient lightbulbs.

November

Carpool when you can.

Save on expensive gas by carpooling to work or school when you can. Make your holiday shopping more fun and more efficient by carpooling with friends, family, and neighbors.

December

Share what you know.

Share the energy saving techniques that you've learned with friends and family to help them save as well.

Ask us about gift certificates on Nansulate Energy Saving Coatings for your holiday gift-giving.

"Energy saving techniques learned today benefit your family, your finances, and the health of the planet for many years to come."
