

Environmentally Safe Family Friendly

We know that the safety of your family and protection of the environment are important to you.

That's why our Nansulate HomeProtect coatings not only make your home safer and more comfortable, but they are also friendly to the environment.

Our Mold Resistance comes naturally, without the use of any potentially harmful biocides or anti-fungal agents.

Safe for your family.

Safe for your home.

Environmentally Friendly.

That's our promise.

"We are really pleased with the 40% savings in energy cost and the swiftness at which it (the house) cools off and heats up. I tell my friends about it because it really works. You could heat my house with a votive candle and a blow dryer now that it has the nanotech coating on it." - Marc I., Truth or Consequences, NM

Translucent - for interior or exterior use. Highest insulation value of the HomeProtect line. Excellent mold resistance.

White, semi-gloss - for interior use. Suitable for tinting. Excellent mold resistance.

No need to change your current colors. Go clear with HomeProtect ClearCoat!

Applying HomeProtect is as easy as painting a room, and there is no special equipment needed. To create a good thermal barrier, apply three coats to ceilings and/or attics and to walls that abut the exterior.

Nansulate is water-based, making cleanup easy with soap and water.

Application can be done with a brush, roller, or paint sprayer.

Easily applied over pre-painted surfaces

Use on wood, stucco, drywall and more

Add an invisible thermal barrier to any home

Enjoy all the benefits of Nansulate HomeProtect

- Provides a thermal barrier to heat transfer
- Improves your comfort all year round
- Saves on energy costs
- Resistant to existing and new mold growth

The most comfortable decision you'll ever make

Comfortable for your home and comfortable for your wallet. Spend less on your heating and cooling bill each month. Enjoy a home with a steady temperature in an environment that's pleasant, healthy and energy efficient. HomeProtect keeps the heat out in the summer, and stops heat from escaping in the winter. So you're always comfortable.

"Being a civil-engineer working in the environmental field I was naturally skeptical when I stumbled upon the nano-tech website. I have limited time but have been applying HomeProtect ClearCoat to my finished attic, wood exterior doors, and a couple of old skylights and windows. The last three months (May, June, July), I have used 40%, 40%, and 50% of the electricity I used last year during the same months. This is our hottest time of the year." -Dave, Davenport, Iowa
